

Press release cuboro Ltd.

cugolino hit - it's a hit

Recently, there are swift ascents in the cuboro Ltd. owing to the new supplementary set "cugolino hit". The contained catapult – consistent with the cuboro and the cugolino marble track system – jerks the marble upward alongside the course. The catapult can be manually adjusted and the marble activates the mechanism. The marble is hurled upward up to four cube levels and bolts down the marble track course with the force of gravity. The new supplementary set "cugolino hit" contains 16 elements including the catapult made from beech wood and stainless steel as well as six cuboro original marbles. The supplementary set "cugolino hit" is consistent with the cuboro and cugolino marble track system and is available in specialized toy stores for EUR 99.90/CHF 128.-.
